

# GEO360 CONTROLLER

This wiring schematic is a guide to a typical wiring arrangement utilising the products shown, it is not intended to describe a complete system, nor any particular system. It is up to the system designer to determine the necessary components for and configuration of the particular system being designed, including additional equipment, isolation relays (for loads greater than the control's specified output rating), and any safety devices which in the judgement of the designer are appropriate, in order to properly size, configure and design that system ensuring compliance with IEE regulations.
